CUSTOM BRAILLE EMBOSSER · VERSION 2

Visual Assembly Guide

The build of the Custom Braille Embosser, Version 2, as pictures only, in the order of the Maker Guide's steps; the words are in the Maker Guide and the Assembly Guide By Touch.

1. Parts

The Push-out Plate, last in the row, is optional and is not used in the twelve steps: it lifts the rollers out when the message is changed.

How to read the pictures

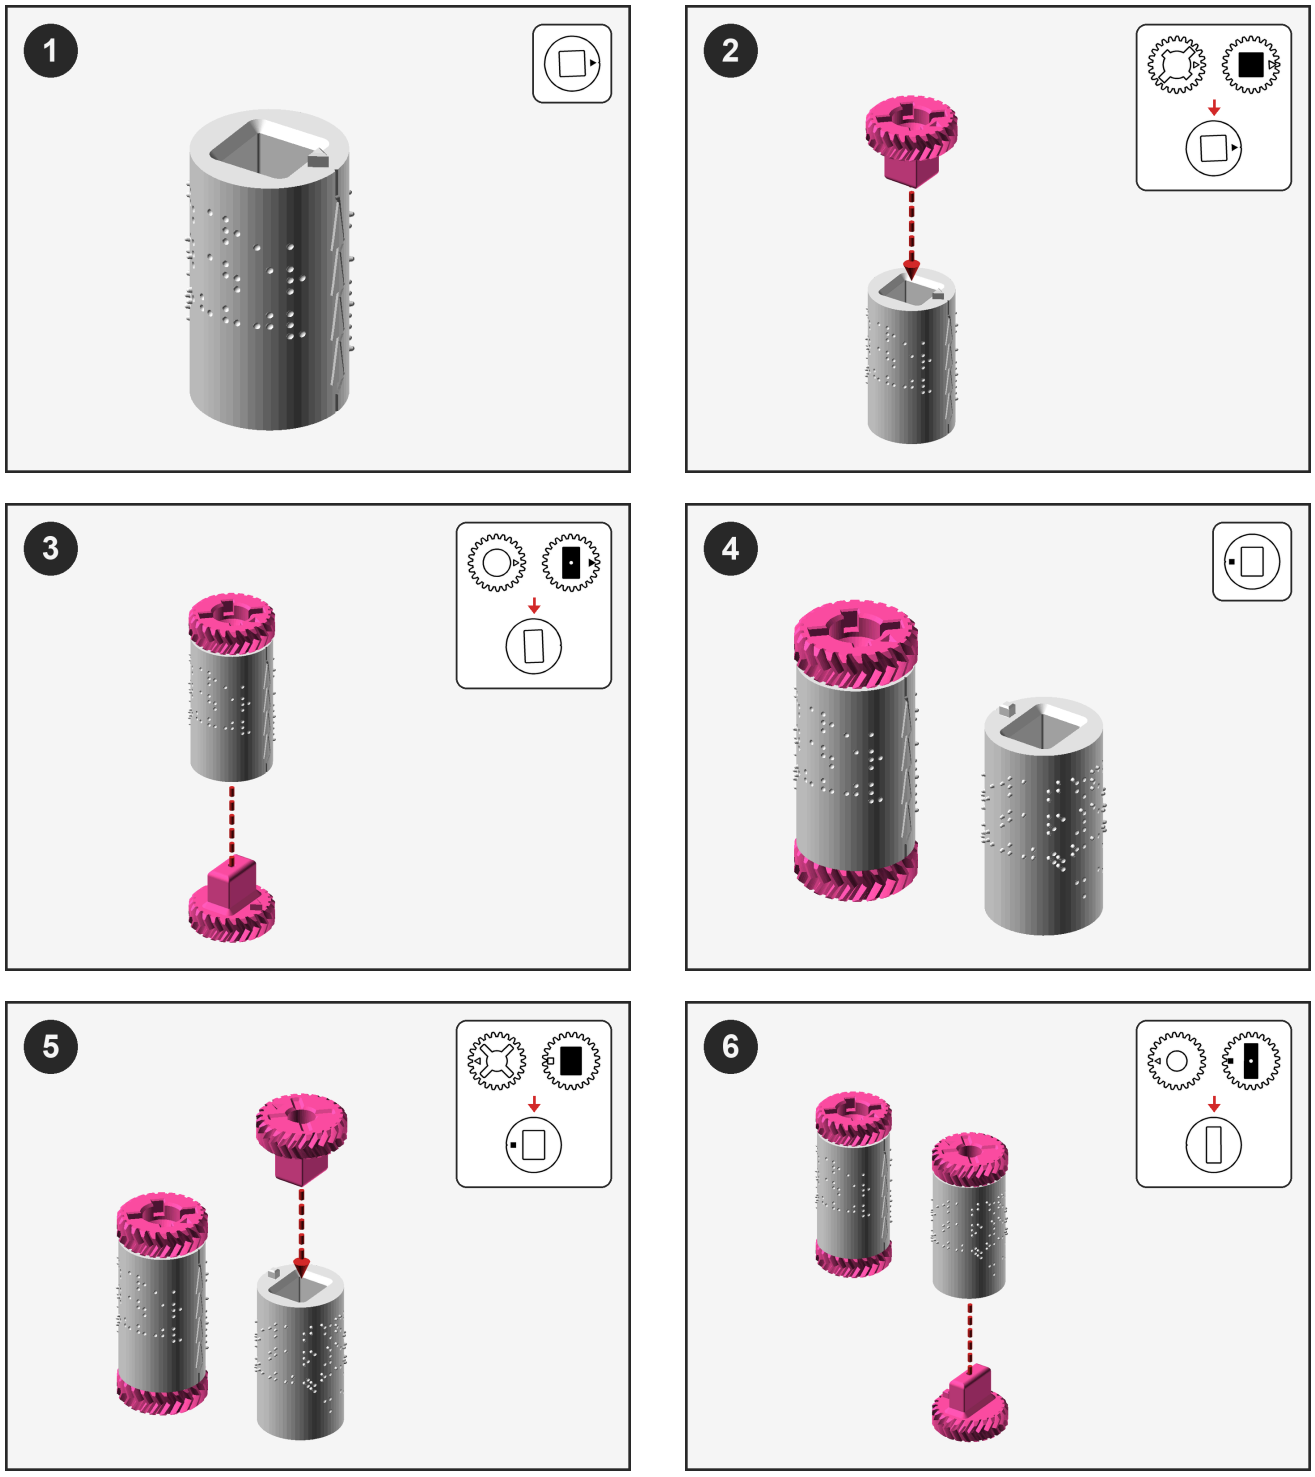

Black circle with a number: the step, in order

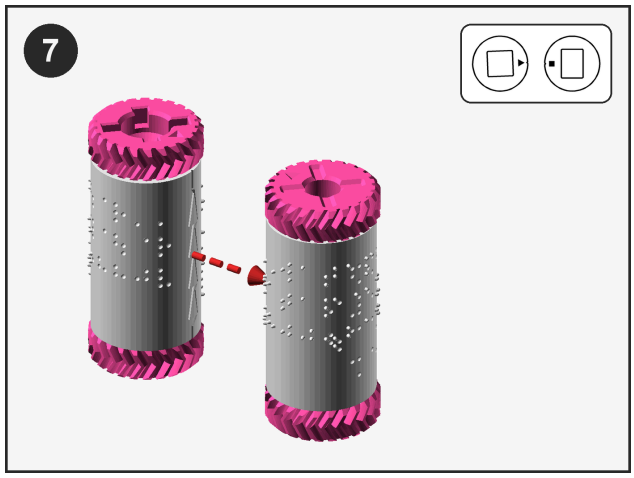

Curved red arrow: turn, the way it points

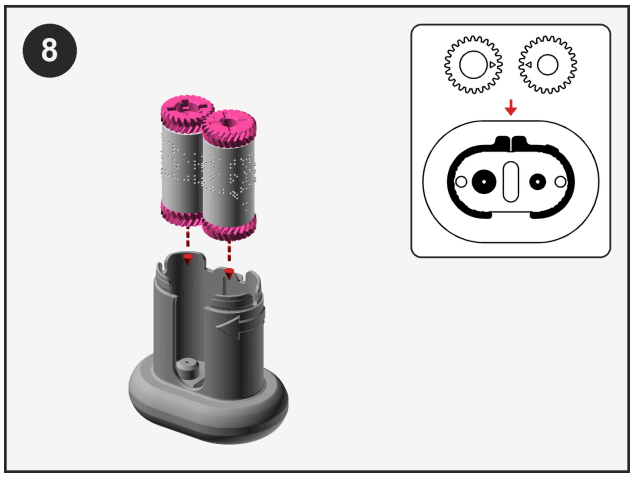

Red dashed arrow: the way the part goes in, from where it is shown to where it seats

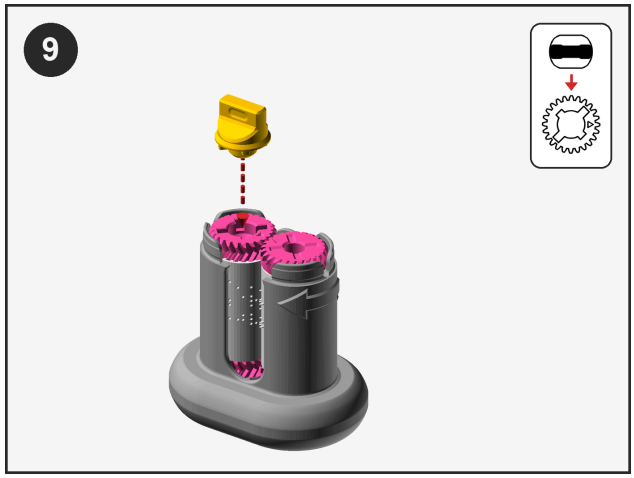

Box at the top right: line sketches of the part to find, its two faces where they differ, and under a red arrow the face it goes onto; black fill stands up from a face, an outline is a hole or a cut
